BROOKLYN, N. Y. 11208

NIGHTINGALE 9-1717

October 11, 1965

T.H. Nelson
Systems Consultant
Box 1546
Poughkeepsie, N.Y. 12603

Gentlemen:

Your inquiry regarding our product, which was shown in a recent magazine, has been referred to us. This product information is included in the enclosed brochure.

If you do not see what you need, the chances are that we have already manufactured it, although it is not illustrated. Our fully integrated electronic and machine shop has been designing and manufacturing various types of equipment for the past 92 years.

We have assisted Western Union, Teletype, Univac, Digitronics, and many others in their development and manufacturing of their Peripheral Equipment. Send us your requirements, and find out about "J.H. Bunnell & Co." quality, delivery, and price.

We thank you for your valued inquiry; please do not hesitate to call upon us for further information.

Very truly yours,

C. JACOBS

J.H. BUNNELL & CO.

New Cummins Tallyprinter

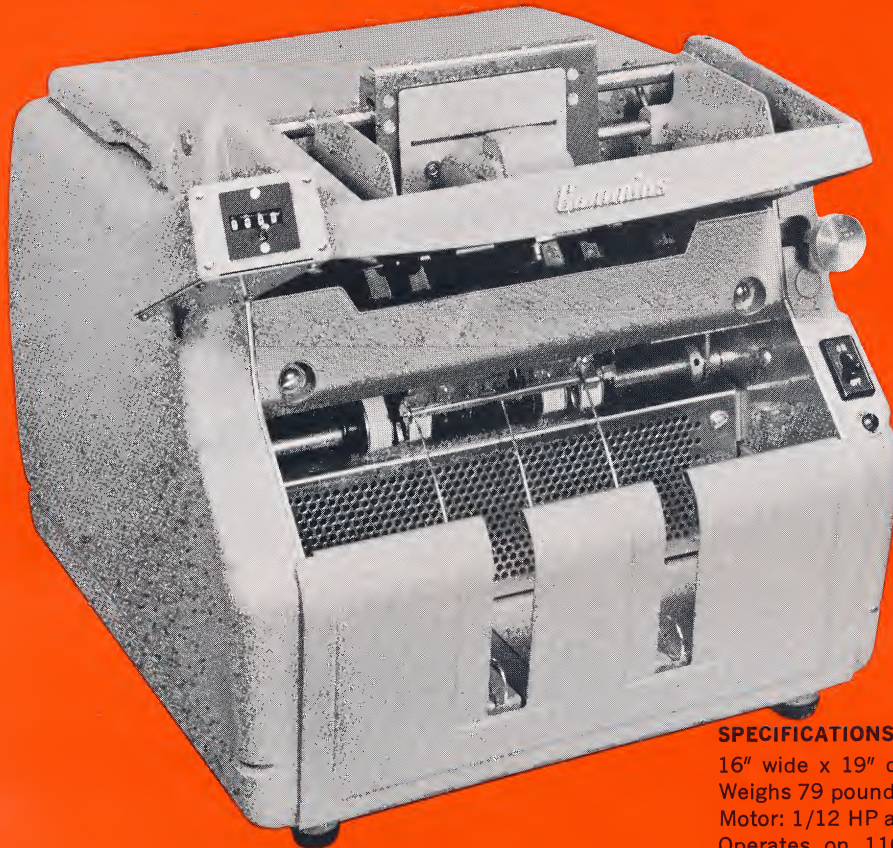

*At last...a modern Counter/Imprinter...
with 4 new exclusive features!*

1. Newest, most modern counting and imprinting machine on the market—compactly designed for modern office needs—can now imprint numbers either consecutively, by batch, or at random.
 2. Unmatched printing quality approaches printing press clarity but requires no daily washup—unique ink dries instantly yet does not evaporate or thicken in ink well.
 3. Exclusive new Cummins “Accur-Matic” Feed provides practically perfect separation—assures over 99% accuracy on mixed sizes and weights of paper, 100% accuracy on most “alike” items.
 4. Exclusive Cummins Magic-Flow ink well is completely automatic. One filling is good for 500,000 impressions—eliminates the mess and fuzzy reproduction of old-fashioned pad inking.
-

NEW Cummins general purpose automatic Tallyprinter

1. **COUNTS** up to 36,000 pieces per hour.
2. **NUMBERS** in batches, or consecutively.
3. **STACKS** in sequence as it prints or counts.
4. **IMPRINTS** any desired specific message. (see back page)
5. **DATES** as it stamps or signs. Prints clearly from wheels or bands—no loose type.
6. **SIGNS** checks with your signature. Dates as it signs.
7. **ENDORSES** with date, item number. Clear, sharp printing—no smudge, no blur.

SPECIFICATIONS

16" wide x 19" deep x 15" high
 Weighs 79 pounds
 Motor: 1/12 HP at 1140 RPM
 Operates on 110 volt,
 60 cycle single phase
 alternating current.

You get major advantages with Cummins Tallyprinter *that no other system can offer!*

Cummins Tallyprinter automatically feeds, counts, imprints, or signs checks, tickets, coupons, money orders, cards. It counts at speeds of up to 36,000 pieces per hour—imprints up to 20,000. Feed is entirely automatic. Just place items in the feeder hopper, press the button, and that's all. Exclusive "Accur-Matic" Feed assures better than 99% accuracy—even on mixed items. It handles items of various thickness in the same batch with no difficulty. Inking is automatic, uniform, No messy ink pads. In the Tallyprinter the ink is delivered evenly by the exclusive Cummins Magic-Flow ink well. No operator adjustment required, no wash up (either of operator or machine)—simply add ink to the well from time to time as required. Tallyprinter is neat, compact, extremely simple to operate—no training required—and designed for modern office needs.

These are just a few of the many time-saving, mistake-preventing Tallyprinter uses:

Many unmatched features

COUNTERS: Counter is under locked cover on signing models. Optional resettable single and double counters on other models are always in full view. One counter counts in ascending order and resets to zero by single depression of button. Lower meter may be set to any number, counts in descending order, automatically stops the machine at zero.

MAGIC-FLOW INK WELL: Exclusive Cummins design, uses special ink developed and used exclusively by Cummins. Finely ground wheel dips into well of ink, transfers thin film to inking roller which inks plates and metal numbering wheels. Ink dries instantly on paper—no smudge, yet does not evaporate or thicken in ink-well. Printing quality approaches that of a high grade printing press, but without the daily washup always required on presses and duplicators.

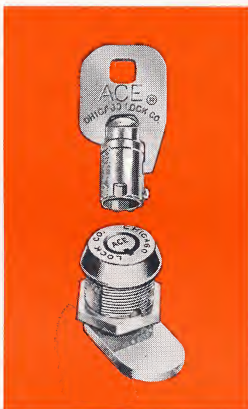

"ACCUR-MATIC" FEED: Assures virtually absolute accuracy—no skips, no doubles, regardless of paper thickness, mixed sizes, or mixed weights. Easily adjustable abrasive stone achieves practically perfect separation, provides unmatched—better than 99%—feeding accuracy on a batch of mixed items, and 100% accuracy on most "alike" items.

Your Signature

SIGNS AND DATES: Signing model dates as it signs your signature. Your signature is the same on every check—always clear and perfect. Dies are made from your best signature; the Magic-Flow ink well assures uniform signature impressions.

LOCKS: Key Switch (below) controls operation of signing models, prevents unauthorized use when operator is called away from machine. Cover Lock Key (top) protects signature die and counter. Only authorized operator can install or remove signature dies and reset the automatic check counter. Tubular locks provide more than 80,000 variations, prevent any duplication.

RAPIDSET: Push button advances number being marked when new batch is started.

CONSECUTIVE:—Number advances automatically, with each item imprinted—or with every other item imprinted.

NON-PRINT SWITCH: The non-print switch is another optional feature for use when Tallyprinter is used for both imprinting and counting, making it possible to count without any imprinting by merely throwing this switch.

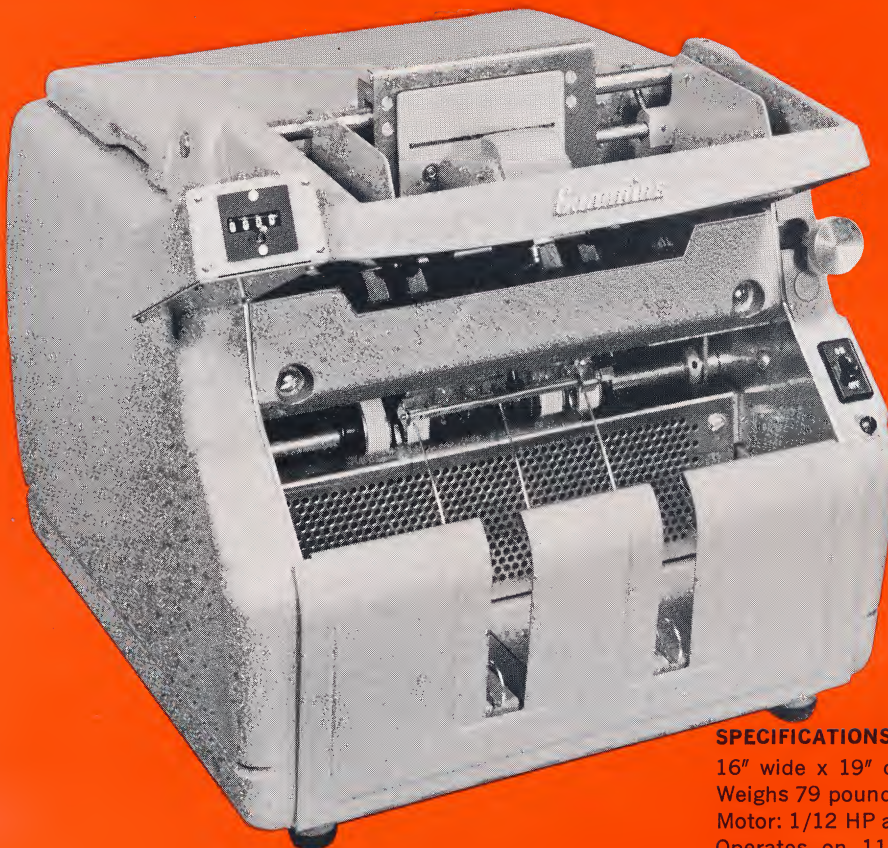

VARIETY OF MODELS: Cummins makes a wide variety of Tallyprinter models to meet specific requirements—all compactly packaged for ease of use and maintenance. Many options are available, such as a vertical feed model for extra long items, special numbering units, others. Ask the Cummins man to recommend the model that will best meet your present needs and your future requirements.

HOPPER CUTOFF SWITCH: Tallyprinter shuts off automatically when hopper is full. Removal of imprinted or counted items and depression of reset button near switch restarts feed.
